

OVR TECH SESSION

Place: Monroe Collision Center

Address: 721 Garver Road, Monroe OH. 45050

Phone: 513-539-7800

Date: August 28

Time: 10:00 am to 1:00

This session will be to acquaint everyone with a newest paint technology used in auto repair. The location is a very new collision facility in Monroe Ohio. The new facility is owned by Bob Gorman, a previous member of OVR, and has recently been opened. He has had many years of experience in the auto body repair industry and decided to open a state of the art shop with some really neat pieces of equipment. He has the ability for mix his own paint, reproduce factory spot welds, straighten twisted chassis and paint with water based paints in an environmentally friendly paint booth. I think everyone would enjoy seeing his new facility and hearing about the newest materials and methods of auto body repair and painting.

For those of you who had visited Bob's last shop, you will be pleasantly surprise with the amenities and the finishes that Bob has incorporated into his new place. Bob has also offered to serve lunch with the tour of his new facility.
